**The Nikau Coopworth Stud** has been breeding rams for productive farmers for 44 years.

The flock is being farmed on the coastal hill country of Waikaretu. This property provides the challenges the flock will need to meet all requirements. Facial Eczema is a limiting factor to production in this area. Having tested for F.E. Tolerance for 34 years the Nikau flock has become highly tolerant to F.E. The dose rate has been at 0.6 mg/kg. for 12 years. All young stock are GGT tested each autumn after exposure to natural challenge.

The ewe flock is on a no drench policy and selection for open breech, dag free sheep is ongoing. Tough selection pressure is also being applied to produce sheep with sound feet and good conformation.

DNA testing is used to identify animals with genetic potential in the areas of growth, muscling, parasite resistance and fertility.

The Nikau Flock is Brucellosis accredited free.  
The Nikau Flock is member of NZ Ovine Sire Reference scheme with our sires having performed well.

Rams from this stud should increase production in all purchase's flocks. Breeders can purchase with confidence. All rams are guaranteed.

The Auctioneer.

---

## Explanation of Terms in Catalogue

**NZMW + M**      **New Zealand Maternal Worth** -index for all production traits combined.

**DPCR**              **Dual Purpose Capped Reproduction**

**DPS**                **Dual Purpose Survival**

**DPG**                **Dual Purpose Growth**

**DPA**                **Dual Purpose Adult Size**

**DPM**                **Dual Purpose Meat**

**DPW**                **Dual Purpose Wool**

**DPF**                **Dual Purpose Fecal Egg Count**
